

Ruthler Louis

Junior Software Engineer

Amsterdam, Netherlands • www.linkedin.com/in/ruthler-louis-35b5133b1

PROFILE

Motivated junior software engineer currently training at Codam Amsterdam (42 Network). Brings a solid foundation in C, Python, Java, and web technologies gained through both formal academic study and intensive project-based learning. Fluent in four languages and eager to apply technical skills in a professional setting while continuing to grow as a developer.

EDUCATION

Software Engineering

2025 – Present

Codam Amsterdam (42 Network) | Amsterdam, Netherlands

- Peer-to-peer, project-based learning with a focus on C, C++, and Python programming.
- Covers systems programming, memory management, Unix system calls, and algorithmic problem-solving.
- Part of the globally recognized 42 Network, known for its rigorous self-directed curriculum.

Bachelor of Science in Computer Science (incomplete – 2 years completed)

Prev.

IU International University of Applied Sciences | Berlin, Germany

- Completed two years of core coursework including programming fundamentals, data structures, and algorithms.

TECHNICAL SKILLS

Languages: C, Python, Java, HTML, CSS

Concepts: Memory management, OOP, systems programming, web fundamentals, algorithms, data structures

Tools: Git, Linux/Unix, VS Code

LANGUAGES

Native: French, Haitian Creole

Fluent: English, Spanish

A2 Dutch

PROJECTS

Systems Programming Projects

2025 – Present

Codam Amsterdam – 42 Network

- Developed low-level C programs covering memory management, pointers, and Unix system calls.
- Implemented core utility functions, shell-like programs, and algorithmic challenges under strict code norm constraints.
- Collaborated with peers through code review sessions in a self-directed learning environment.
